

# CARBON MONOXIDE LEAK SYMPTOMS

IF CARBON MONOXIDE IS LEAKING INTO YOUR HOME, YOU OR YOUR LOVED ONES MAY EXPERIENCE ONE OR MORE OF THE FOLLOWING SYMPTOMS

## LETHARGY AND WEAKNESS

Unusual tiredness and difficulty performing daily activities, with persistent exhaustion despite rest.

## CONFUSION

Disorientation, difficulty concentrating, and memory problems.

## RESPIRATORY DISTRESS

Difficulty breathing, shortness of breath, and chest pain, with an increased breathing rate.

## BLURRED VISION

Sudden inability to see clearly, with objects appearing out of focus or hazy.

## DIZZINESS

Sensation of spinning, lightheadedness or a loss of balance - often leading to fainting or falls.

## NAUSEA

Persistent feeling of sickness and an urge to vomit.

## UNEXPLAINED HEADACHES

Persistent or recurrent headaches without a clear cause, varying in intensity and starting suddenly.

## RED BLOTCHES ON SKIN

Patchy red discoloration resembling a rash.

## LOSS OF CONSCIOUSNESS

Sudden fainting without warning, lasting for varying lengths of time depending on the severity of carbon monoxide exposure.

## STEPS TO TAKE

### EVACUATE IMMEDIATELY

Get everyone out of the house and into fresh air.

### CALL 911

Contact your local emergency number to report the suspected carbon monoxide leak.

### VENTILATE THE AREA

Open windows & doors to allow fresh air to circulate.
